The Cost of Copper.

is not so very important now. The netal sells for seventeen cents a pound and the average cost is twelve cents. There s five cents clear profit.

But copper will not always sell for seven-teen cents. It has often sold for less than twelve cents, sometimes for long periods. Then the cost of production becomes of the

utmost importance.
The SAN LUIS MINING COMPANY is actually producing copper to-day that costs it nothing. It is all profit. The gold and silver values in its ores are enough to pay the entire cost of production. This is not a theory, but a demonstrated fact. We know we can do it because we actually are doing it. The precious metals in our ores are paving all the cost of the production of all the metals every month, and the production is steadily increasing. Our mines have as much copper as anyone's and gold and silver enough in the ores to pay for getting it out.

Which stock will the wise investor purchase-the stock of the company that make money only when copper is high, or the stock of the company that can make money and pay dividends no matter what is the price To provide additional capital for building

a railroad to its mines and for additional equipments the SAN LUIS MINING COM-PANY is increasing its capital from 225,000 shares to 300,000 of the par value of \$10 each, and offers the new stock for subscription at par, \$10 a share. Make checks payable to the SAN LUIS MINING COMPANY, and
